Academics

My educational journey began at Gibson Youth Academy, where I graduated from middle school with a solid academic foundation and a curiosity-driven learning style. Being forward, outward-thinkingness has high-brows, an hyper-focus, and a strong father, who really inspired me to pursue a career in computer science. Now, I am a senior at Montgomery Blair High School, and I have discovered my passion for programming. It sparks innovation in solving real-world problems and creating impactful solutions. My journey has been a rewarding one, filled with challenges and opportunities for growth. I'm excited about the prospect of pursuing a degree in computer science, as it aligns with my long-term goals and interests in the field. I'm confident that my high school experience has prepared me for success, and I look forward to leveraging these skills and knowledge in my future endeavors. My ultimate goal is to contribute to the ever-evolving world of technology and make a positive impact on society through innovative solutions. I'm ready to embrace the challenges and opportunities that lie ahead, and I'm confident that my high school experience has prepared me for success in my future endeavors. I'm excited about the prospect of pursuing a degree in computer science, as it aligns with my long-term goals and interests in the field.
